

## For us to source your new UK caravan acrylic window we need the following:

1. You will need to take a photo of the caravan itself.

2. Another photo of the damaged window, clearly showing the Windows position on the caravan

3. A photo of the 2 codes,

\*One on the top right of the window (small clear thumb sized sticker)

This is the colour code etc

\*The second is a 17 digit code on the bottom right of each window

**Both codes are exactly the same on all windows**

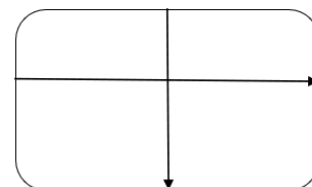

4. Measurements:

\*The length & width measurement of the aperture

\*The length and width of the window itself,

Please put measurements in writing – NOT a photo with tape measure

5. Please email these photos to us, along with:

\*The Make, Model & Year of the caravan

\*Your name, email address & phone number

\*Your insurers email address & a claim number

Please also send a photo of your registration plate

\*Please note,

\*We cannot guarantee when your window arrives, that the tint will be an exact match, due to fading etc of your existing windows

\*Some windows are harder to source than others & there may only be 1 in stock, so once we have confirmation of availability then it is best to order without too much delay
